ZUDO COB LIGHTS

ADD A TOUCH OF LUXURY TO YOUR SPACE WITH OUR ZUDO LIGHT RANGE

Our Zudo Lights are designed to be seamlessly integrated into your space, providing a clutter-free appearance that complements modern and luxury interiors. With innovative heat dissipation and module design you enjoy easy installation with a gentle and pleasant light.

The embedded parts are adjustable in height.
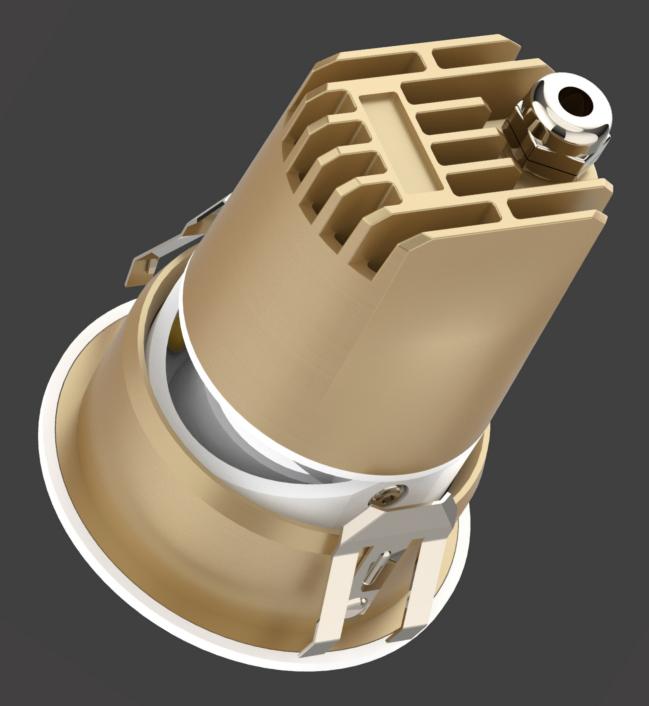

30° Adjustable Angle.

Integrated anchoring structural spring.

HIGH EFFICIENCY HEAT DISSIPATION

The flow fin cooling structure can dissiapte heat quickly.
Prolong the service life of lamps.

THREE REFLECTIVE CUP SHAPES FOR YOUR LIGHTING NEEDS

CANQUA

SPECTRA LIGHTS

ILLUMINATE YOUR SPACE WITH PRECISION AND BRILLIANCE.

Our Spectra Light is uniquely designed with a reflector and high-powered COB LED chip. Short heatsink suitable for all kinds of installations. The die casting aluminium profile provides excellent heat dissipation. Isolated driver solution both in dimmable and non-dimmable versions achieves stable working performance.

PRODUCT OVERVIEW:

| Gunmetal | White | Matte Black |

SIZE	CUT-OUT SIZE	POWER	BEAM ANGLE
63×H78MM	55MM	9W	36°

103×H106MM	95MM	15W	36°

PRODUCT DETAILS:

REFLECTIVE CUP

Uniform Luminous,
High Transmittance.

RADIATOR HOUSING

Die Casting Aluminium allows more efficient heat dissipation and safer in connecting ground wires.

CLIP DESIGN

High Quality buckle,
Easy to install,
More firm.

BRAND DRIVER

Brand driver with safe and reliable quality and 5 years warranty time.

DIMMABLE & TUNABLE OPTIONS

Creating the right ambiance is all about lighting, and some spaces may need to cater to different atmospheres throughout the day. Crisp white light helps us focus and feel awake, while warm light creates an intimate and soothing environment.

With our Spectra Light Range you can change the light ambience right away with a single click.
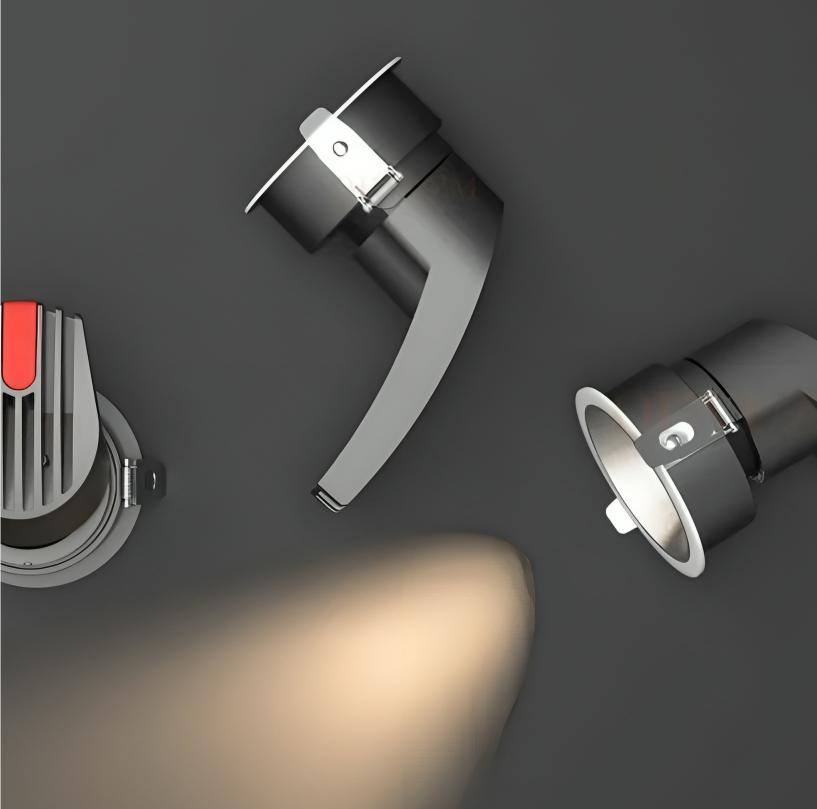

Single color dimmable Triac /0-10V/ Dali

GET OPTICAL FLEXIBILITY WITH OUR POLO LIGHT RANGE.

More than 90% of the environmental impact of a lighting fixture derives * from its use. Crystal achieves exceptional lighting efficiency values, of up to 155 lm/W, through variable management of the luminous flux. It is precisely through responsible use of light that the environmental impact of a lighting fixture can be significantly reduced. Crystal is also made using materials that are 100% recyclable and, where possible, themselves recycled in optimal percentages, i.e. without affecting performance

CANQUA

WATERPROOF COB LIGHTS

IP65 DUST-PROOF AND WATERPROOF GRADE

This COB downlight features an IP65 waterproof grade, providing robust protection against dust and splashes of water from any direction. While primarily designed for indoor use, it is well-suited for areas where occasional exposure to moisture or dust is expected.
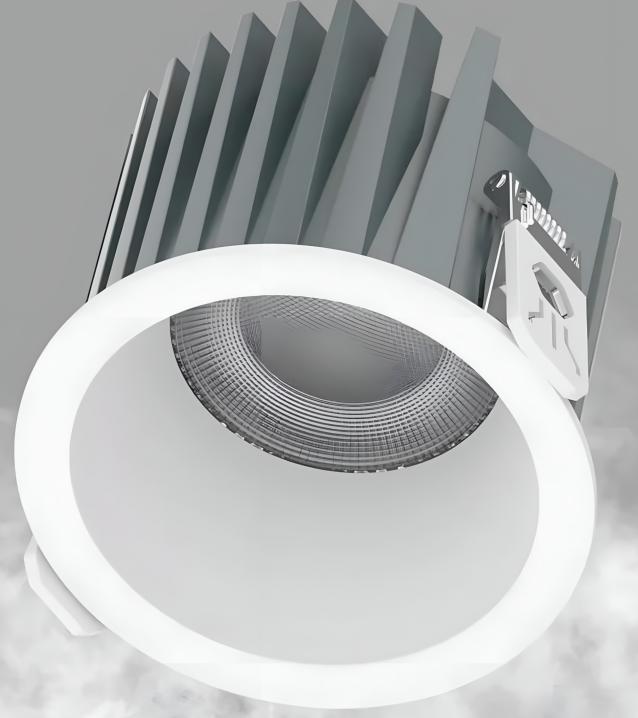

Its durable construction ensures reliable performance, making it an excellent choice for environments requiring enhanced protection without compromising on design or efficiency.

It can withstand the environmental test of bathroom, kitchen, balcony and other easy to be corroded by water mist and oil smoke.

- The lamp body is crafted from precision-engineered aluminium, known for its lightweight and durable properties.

- This enhances structural stability and optimizes heat dissipation, ensuring efficient light output while preventing overheating.

- Our patented shape design, the light has good heat dissipation ability.

PREMIUM
SURFACE COB 360°

HIGH-END ALUMINIUM

The preferred material is treated by lacquer treatment. The lamp is corrosion- resistant and durable. It is anodized and is not easy to fade.
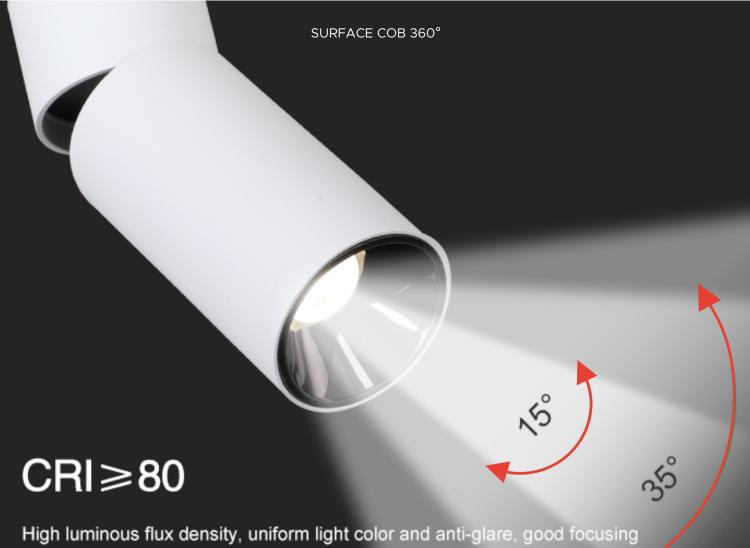

HIGH TRANSPARENCY OPTICAL LENS

The high-transmission optical lens has a higher light-emitting rate than the ordinary lens, and can suppress glare and make the light effect work well.

CEILING BASE

Thick aluminum, durable and safe.

CRI ≥ 80

High luminous flux density, uniform light color and anti-glare, good focusing performance, can enlarge the details of objects, increase the stereoscopic light, and create a special atmosphere for the scene.

INSTALLATION GUIDE:

01
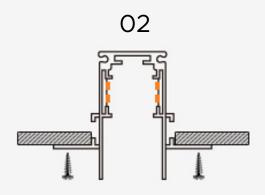

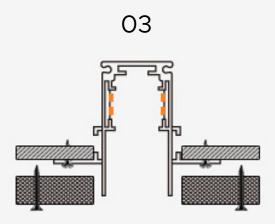

Cut holes in the fixing (35-40mm).
Then insert the track into the hole slot.

02

Tighten the rails on the edge.
Secure with screws to ensure firmness.

03

Gypsum outer board (10.5MM) covered
under the track Fixing gypsum outer panels
with self-acting screws.

04

Plaster 2-3 times until the gap between
the gypsum board and the guide rail is
completely covered.

LONG SERVICE LIFE

STRICTLY SELECT PRODUCTION MATERIALS

Carefully selected production materials, not easy to rust, long service life, durable.

HIGH-POWER LED LIGHT SOURCE

High power lamp bead, highlighted foot title, energy saving, high color rendering.

HIGH QUALITY DRIVER

Customized driver or brand driver, long lifespan and stable quality.

DURABLE THICK BASE

For fixed wall and ground, adjustable and removable is workable.

WATERPROOF MATERIAL

IP65 waterproof nut and aluminum gland, waterproof and moistureproof.

WATERPROOF & DUST-PROOF

HIGH COLOUR RENDERING

LOW ENERGY CONSUMPTION

SCIENTIFIC HEAT DISSIPATION

FIVE YEAR WARRANTY

CUT ANY-WHERE WARDROBE PROFILE CUM STRIP

GLAM UP YOUR SPACE WITH CANQUA'S WARDROBE STRIPS

Our flexible wardrobe profile cum strips provide a versatile solution to add depth to your wardrobe. Particularly effective along plinths, shelving and for highlighting architectural alcoves, recesses and your showpieces.

10X10MM MINI-SIZE

Premium Finish.

PRODUCT FEATURES:

- Indirect linear lighting for your wardrobe.

- Recessed installation in wooden panel.

- Customizable length as per requirement.

- Finish: Silver, Black.

- CCTs: 3000K, 4000K, 6000K.

FOUR ADJUSTABLE ANGLES TO LIGHT UP

CANQUA

LED STRIP LIGHT

ICS REGULATOR

Specific integrated circuits guarantee luminous uniformity over the entire length of the product and intervene when voltage drops occur (typical in long stretches), preventing drops in luminous flux.

QUALITY GUARANTEED

All our strips are certified and guaranteed for 3 years. The company is ISO 9001 certified. The materials and components used, for the construction of our products are of highest quality.
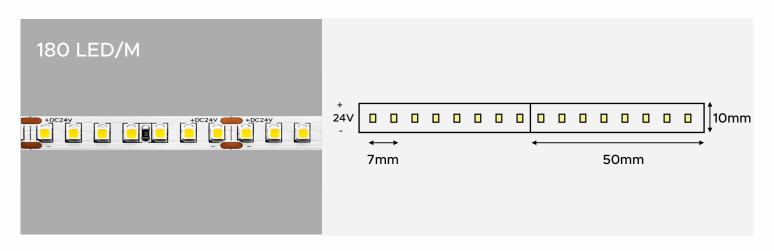

WHY CHOOSE OUR LED STRIPS ?

Our LED Strips have been designed to deliver superior performance in advanced lighting designs. Created to guarantee high efficiency and performance of the highest level, selected LEDs instead allow true colour accuracy with a high Colour Rendering Index, ideal when the highest quality of light is required. Our LED Strips guarantees high flexibility and better thermal and electrical conductivity, A collection suitable for versatile and efficient installation solutions, designed to create welcoming atmospheres or emphasise architectural details without compromising the budget.

PCB: 8X12mm X 2

Model:
CAN-SILICON-SF-FB-5020A
Size: Lx50x20mm
PCB: 8-10mm x 2

FEATURES:

- Anti-yellowing and heat resisting silicone, chemical resistance acid and alkaline, longer life span.

- Pure silicone material, more flexible than ordinary neon tube, quicker heat dissipation.

- Uniform and soft luminance, no light spot.

- New design with recessed mounting, no need to thread light strip into neon tube, easy installation and replacement of light strips.

CANQUA

ON REQUEST

Tailor-made Lighting: Precision Cuts For Unique Projects.

Canqua introduces a new custom cutting service dedicated to the LED Profiles from the custom light section, designed to offer highly customized lighting solutions, perfectly calibrated for every design need. Customization becomes simple: after choosing the profile model, diffuser, and ideal length, Each fixture is made with quality materials and technologies, ensuring extraordinary lighting performance and maximum installation versatility.

1.
Select the profile and accessories

2.
Select the strip

3.
Specify the dimensions and cable position

4.
The fixture is ready for installation

Why choose the custom service?

- Maximum customization and adaptability for any type of project.

- Tailor-made, complete, and ready-to-use fixtures.

- Reduced costs and faster installation.

- Enhanced aesthetics for the interior.

- Improved functionality & efficiency.

SUS TAINAB ILITY

Waste optimization for efficient sustainability.

ACCESSORIES:

LED STRIP CONNECTORS

SOLDER-LESS CONNECTION

WHAT IS LED STRIP LED CONNECTORS ?

LED strip connectors are small devices used to connect two or more sections of LED strip lights together, allowing them to be joined and extended as needed, These connectors typically consist of a male and female connector, which can be inserted into the ends of two separate LED strip lights, creating a secure electrical connection between them.

LED strip connectors come in various types, including solder-less connectors, which are easy to install and remove, and soldered connectors, which are more permanent. They are also available in different pin configurations, such as 2-pin, 3-pin, 4-pin, and 5-pin connectors, depending on the specific LED strip light being used.

Overall, LED strip connectors are essentials components for creating customized and versatile LED lighting installations, allowing users to join, extend, and configure LED strip lights to suit their specific, needs and preferences.

SOLDER-LESS CONNECTION	VARIETY OF CONNECTORS	WIDE COMPATIBILITY
LED connectors eliminate the need for soldering, providing a simple, easy-to-use solution for connecting strips.	Available in multiple configurations, including straight connectors, corner connectors, T-connectors, and Y-connectors, allowing for versatile use in different lighting setups.	Designed to fit various LED strips, such as single-colour, RGB, RGBW, and RGB CCT strips, ensuring compatibility with a range of lighting systems.
